FRANK ADU-GYAMFI

Technical Product Manager · Product · Market Research · Data Analysis

Accra, Ghana · gyamfifrank9@gmail.com · +233 246 194 361 · frankadugyamfi.com

PROFESSIONAL SUMMARY

Technical product manager working across three disciplines: product management, market research and data analysis. At Hubtel (Ghanaian fintech and quick commerce) since 2023 — promoted twice, from product researcher to product owner to leading platform builds end to end, including a fraud and transaction monitoring platform protecting 30M+ customer accounts. Doing market research since 2019, from field surveys for Wilmar and Unilever to a consultancy that has served 20+ clients. Certified PSPO I, AWS Cloud Practitioner and Google Data Analytics; German B2.

PROFESSIONAL EXPERIENCE

Intelligence Resource Engineer · Hubtel Ltd., Accra (hybrid) *Aug 2025 – present*

- Own the **Transactions Monitoring Portal**, a fraud and transaction monitoring platform protecting 30M+ customer accounts: stakeholders set the goal; I designed how it works, prototyped it and led engineers through the build. 1,700+ cases detected and GHS 13.9M in at-risk transactions flagged; used daily by ~25 fraud and risk analysts (as of Oct 2026).
- Built the **Consumer Intelligence System**: live dashboards unifying orders, cancellations and deliveries across 850K+ orders (~GHS 600M) a year — used to understand customer behaviour and shape how the product improves.
- Built a **rider hotspot model** that positions delivery riders where orders are coming from, now live across every zone, so orders reach customers faster.
- Own products end to end: engage stakeholders, prototype to confirm alignment, then run sprints with engineers through launch and backlog.
- Lead administration of the company's AI tools (Claude, ChatGPT, Amazon Quick) and work AI-first, with LLM tools connected to production data for analysis and reporting.

Feature Coordinator · Hubtel Ltd., Accra *Jul 2024 – Aug 2025*

- Product owner of the **retailer back office** serving 4,000+ businesses — the system behind what customers see and buy on the consumer app.
- Took the back office from a shared side of the consumer product to a standalone product with its own engineering team, so retailer features shipped faster.
- Launched features that made retailers more productive: faster onboarding, simpler setup, and accurate menus and pricing customers see in real time.
- Engaged retailers through interviews, surveys and usability testing; wrote PRDs, led sprints and tested features before release.

Product Researcher · Hubtel Ltd., Accra *Sep 2023 – Jul 2024*

- One of the first product researchers Hubtel hired. Helped drive a record-order period within two months of joining, through research that clarified what customers valued and what held them back.
- Analysed feature performance with funnel, churn and A/B analysis to guide which consumer-app features to build, keep or retire.
- Ran usability testing and competitive UX research on global food-delivery apps such as Bolt Food and Uber Eats; reported monthly and end-of-year insights to stakeholders.

Founder, Consultant · Insight Data Lab, Accra (remote) *Jan 2020 – present*

- Research and data consultancy: 20+ clients served, each engagement scoped, priced and run from brief to delivery.
- Market research for small businesses — customer surveys, competitor and comparative-pricing analysis, and in-market product testing before launch.
- Designed, built and operate an order-management system for a restaurant, in live daily use; built a hotel's booking and revenue system in Excel/VBA, which the client has since commissioned as full software.

FIELD MARKET RESEARCH

Population Census Officer · Ghana Statistical Service, Sunyani *Jun – Jul 2021*

- Collected, validated and analysed household data for the 2021 Population and Housing Census to national data-quality standards.

Data Collector & Market Researcher · Unilever, via AMP Ltd · Bono Region *Jul – Aug 2020*

- Mapped where and what customers buy across the region; analysed top sellers by area to identify new routes, retail clients and product opportunities.

Promotion & Market Survey Coordinator · Wilmar Ghana · Bono Region *Jun – Sep 2019*

- Analysed sales data for Frytol, Fortune Rice and Viking to find the best market areas and point-of-sale locations; reported sales strategies to senior leadership.

OTHER EXPERIENCE

Lecturer (part-time) · University of Cape Coast Distance School *Nov 2021 – Sep 2024*

- Taught conflict resolution and change management, levels 100–400.

Ward Inventory Manager (National Service) · Regional Hospital, Sunyani *Sep 2017 – Oct 2018*

- Built the ward's stock-tracking system in Excel after finding supplies arrived but usage and balances went untracked.

CERTIFICATIONS & LANGUAGES

- PSPO I — Scrum.org (2026) · AWS Certified Cloud Practitioner CLF-C02 (2026) · Microsoft Certified Business Analyst (2024) · Google Data Analytics (2024)
- English — fluent · German — B2 (Goethe-Institut, 2026)

EDUCATION

MBA, Marketing (3.72/4.00) · Catholic University College of Ghana *2017 – 2019*

BSc Management — First Class Honours (3.62/4.00) · Catholic University College of Ghana *2013 – 2017*

SKILLS

- **Product:** discovery & user research, PRDs, prototyping, roadmapping & prioritization, A/B testing, Agile/Scrum, stakeholder management (Azure DevOps, Jira, Confluence, Figma)
- **Market research:** survey design, field studies, mystery shopping, trade interviews, competitor & pricing analysis, in-market product testing, usability testing
- **Data:** SQL, Mixpanel, Power BI, Tableau, Metabase, Excel/SPSS, KPI definition, funnel & cohort analytics, executive reporting
- **AI-native delivery:** LLM workflows (Claude API, MCP-connected data agents), prompt engineering, AI-assisted prototyping & development, AI platform administration
